

Customer Success Story

Seascope leverages cloud computing and benefits from the Akereon email services for shipping.

Seascope is a shipping industry agent and a broker with an impressive record in providing top quality services, with the interest of the client at heart. Today, they offer their services to over 150 companies and represent more than 16 engine manufacturing and supplying companies. For more than 24 years, Seascope has represented a number of notable engine and vessel machinery manufacturers in Greece. The company was set up in Piraeus, in 2005, having

secured collaboration with two of the leading engine manufacturers and suppliers in the shipping industry, Yanmar Engineering and Diesel United.

Seascope is using akéreon cloud services for their email and company applications, to protect critical data and upgrade the user experience for computing and support.

“We use **akéreon** cloud services to host our servers, company applications and specialized email services for shipping. **Akéreon** consultants attended the whole project and made our life easier. We know that our data is secure, our applications are always on and that we are able to communicate smoothly with our customers & partners. Akéreon became our trusted IT partner.” says Mr. Dimitris Liaskonis, Chief Executive Manager and President of Seascope Ltd.
